MEDICAL ASSESSMENT SERVICE

This assessment is required by the **Curateur Public du Québec** as part of requesting the institution of a **tutorship to a person of full age** or a **protection mandate homologation**

This process can seem long, complicated and hard to go through. It's true. But let's not forget that the legislator prepared these steps for a reason: *to insure the protection of a vulnerable person. It is important to understand that once a judge rules that an individual is incapacitated, then that person loses their right to make decisions regarding their healthcare and financial affairs!*

HOW DOES IT WORK ?

Here are the steps leading to the medical assessment

1

NURSE'S TELEPHONE CONSULTATION AND PREPARATION

- Explanations of our **full process**
- Signature of the authorization forms to access the patient's previous medical files for each establishments that they visited in the last 10 years.

NOTE

The **Commission à l'accès à l'information of Quebec** states that « *Medical establishments (hospital, CLSC, doctor's office...) have 20 working days to respond to request for an authorization to access medical information.* »

2
